Voice of the customer

Dr. Jean-Pierre Laissy
Top international expert in cardiovascular imaging and intervention

"This cardiac imaging is one of the best examination I've seen, because there is very high contrast, at very low dose of radiation."

Thomas E. Carmichael
Oakland Mercy Hospital, USA

"I have been doing CT scanning for just over 30 years and have got to say we couldn't be more pleased with our Neusoft CT Scanner. I would recommend NeuViz 64 In for any hospital or clinic application."

Dr. Galo Calero Zea
Ex-president of Radiology Society, Ecuadorian Counselor of Calzea Veris S.A.

"The Neusoft product has everything you need and is easy to operate. Also, the engineers give it good support and maintenance. Most importantly, Neusoft medical equipment uses first-level technologies."

Dana M. Buchanan R.T.
Southern Oncology Specialists, USA

"In Oncology there are two things that are expected from a CT scanner. User friendly and dependable. My Neusoft Essence 16 has been both of those things and so much more."

BTMO Hospital
Ukraine, Europe

"Neusoft can provide doctors with powerful solutions that offer advanced tools and user-friendly interfaces, to optimize both workflow and user experiences as well as result in more precise diagnosis."

Dr. Nagui Abdel
Horus Radiology Center, Egypt

"We were among the first of those who use a Neusoft Open MRI in Cairo. Since 2007, and for more than 10 years now, we are using this machine. The technical support behind the machine is excellent.."

RSNA, ECR, JFR, ARAB HEALTH and more...
